Course Title : Operating Systems

Course Code : CSE-325

Section : 02

Semester : Fall 2024

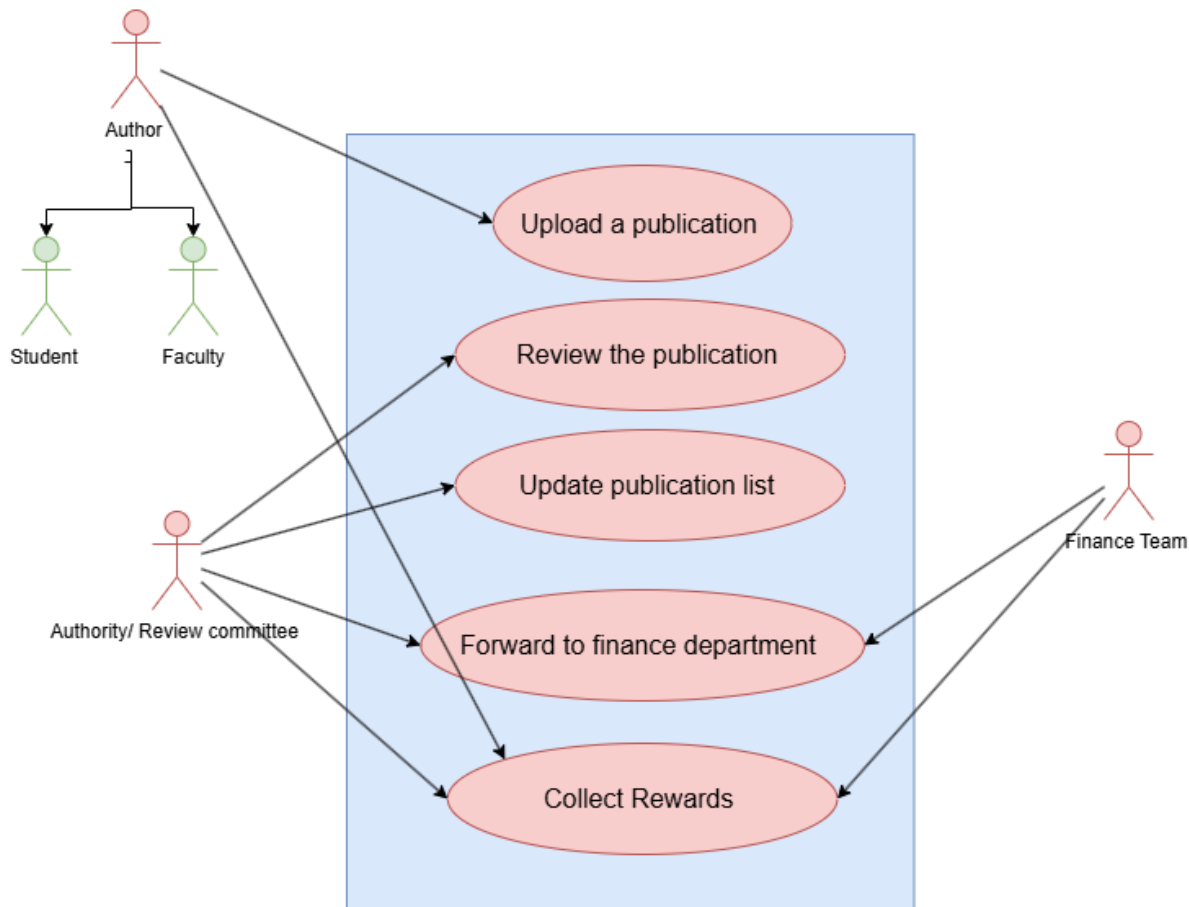

Scenario:

A publication tracking system in a university keeps track of the publications made by the students and the faculties and reward them based on the quality of the publications.

To apply, an author has to give information about their publication. Authors can be students or faculties. The author will be the contact person for further information. To apply, authors need to enter their id (student id/ faculty id), email address, information about co-authors, select type and name of journal/ conference, publication year and doi link.

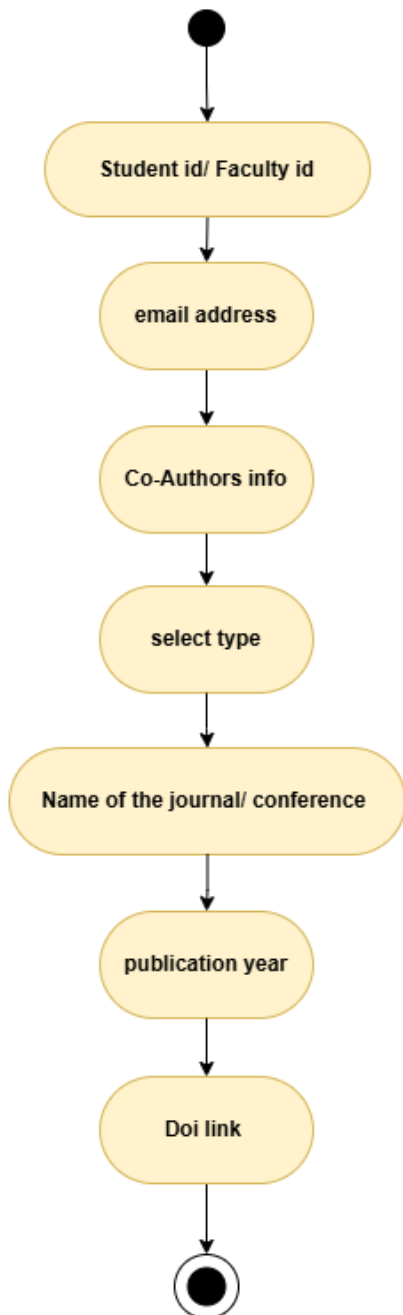

The authority will review the application and if approved, they will update the list of the publication. The application will be forwarded to the finance department with defining the amount they are going to receive. Upon finance department approval, the authority will contact the contact person to collect the amount physically.
